Learning objectives

- To review the principal management strategies for patients with advanced CRC with liver metastasis
- To identify the optimal use of chemotherapy with surgical intervention
- To examine the efficacy and safety of chemotherapy in advanced CRC
- To describe the management of adverse events occurring from oxaliplatin-based therapy
- Practical application of these techniques through a case based interactive workshop

sanofi aventis

Because health matters

This program has been supported through an unrestricted educational grant from sanofi-aventis

Touch pad technology will be used for interactive case based discussions
